ABOUT ME

My journey as a Front-End developer begins eight months ago when I've started to learn Html, CSS, and JavaScript. After finishing the first course I've realized that this is what I want to do for a living and I took action for improving my skills. After I get comfortable with these technologies I learned how to use tools like VScode, Atom, Git, GitHub, Adobe XD or Sourcetree to be prepared for a future job. In the end, I built some personal projects to apply what I've learned during this period.

Currently, I wish to have my first position as a Junior Front-End developer in a company that allows me to learn more and apply in real projects the gained knowledge.

WORK EXPERIENCE

I've worked at some personal projects where I implement what I've learned during the courses that I've followed. You can see them on my website or you can access them on my GitHub account.

EDUCATION

STILL STUDENT
Automation and Applied Informatics
2018 - Present

AUREL VLAICU UNIVERSITY, Arad, RO

During this time, I had courses on Algorithms, Data Structures, Computer Architecture, Arduino with C++ and An Introduction to C, C# and Python.

BACCHALAUAREAT DEGREE
Mechatronics Technician
2014 - 2017

TEHNICAL COLLEGE GHEORGHE CARTIANU, Piatra Neamt, RO

In this period I learned AutoCAD, how to use it and how to design parts of a mechanical system. I have a few papers from county Olympics stage in Mechanics, and other contests.
